The BAQUACIL® CDX™ System

REINVENTED FOR A NEW GENERATION OF  
CAREFREE, CHLORINE-FREE POOL CARE!

# The BAQUACIL® CDX™ System

## An Instant Classic—30 Years In The Making!

Three decades ago, the BAQUACIL® brand introduced a product that quietly revolutionized the chlorine-free pool care movement for pool owners in search of a dependable non-chlorine alternative—one that would produce sparkling clear water, minus red eyes, dry skin and major maintenance.

REBOOTED AND REFORMULATED FOR A NEW ERA OF CHLORINE-FREE POOL CARE.

Of course, there's always room for improvement with any product, and the BAQUACIL portfolio was no exception. Today, with the addition of the third and final step, **the entire system has been rebooted and reformulated for a new era** of carefree, chlorine-free pool care.

**Here's the bottom line:** With weekly additions of all three core products, your pool's chemical levels remain where they should and that means water mold and other pool pollutants and debris don't stand a chance. No wonder this improved system has been building such momentum for the past three years in backyards all over the country! Now, it's yours to enjoy all summer long.
