

MAINTENANCE:

MPT Extra™ Tablet System

About the poollife® MPT Extra™ Tablet System*

poollife® MPT Extra™ Tablets are an easy to use, effective approach to sparkling clear pool water maintenance.

- 4-in-1 Action: Sanitizes, prevents algae, prevents staining & scale formation and clarifies water
- Innovative, patented, exclusive technology
- Convenient one week dosage

New Pool Start-up

After your pump and filter have run for at least 12 hours, take a pool water sample from at least 18 inches below the waterline and bring it to your nearest Authorized poollife® Dealer location for testing. Follow ClearCare Expert™ water lab recommendations for water balance and addition of chlorine stabilizer.

Recommended Ranges for Water Balance

Total Alkalinity TA 80–120 ppm	Cyanuric Acid 20–50 ppm
pH 7.2–7.6	Metals (Copper, Iron) 0 ppm
Calcium Hardness over 200–500 ppm	

Once the balance readings are within the recommended ranges follow the steps below:

System Start-up

Step 1. Sanitize it with poollife® MPT Extra™ Tablets

Add 1 tablet per 10,000 gallons into your feeder or floater.

Step 2. Shock it with poollife® TurboShock® Shock Treatment

Add 1 bag (16 oz.) per 10,000 gallons of pool water directly to the pool for start-up.

Step 3. Defend it with poollife® Defend+® Algaecide (shake well)

Add 8 oz. per 10,000 gallons of pool water directly to pool.

Broadcast chemicals in the deep end of pool while filtration is running. **DO NOT MIX CHEMICALS OR PREMIX ANY CHEMICALS WITH WATER BEFORE ADDITION.**

MPT Extra™

poollife® MPT Extra™ Tablets
are part of a 3-step system

System Maintenance

Daily:

- Maintain 1-4 ppm Free Available Chlorine at all times.
- Run your filtration system a minimum of 8-12 hours a day, for best results.

Weekly:

- Test TA, pH and chlorine levels, adjust as needed and follow these steps.

Follow System Steps:

Step 1. Add additional tablets to feeder or floater as needed based on test results.

Step 2. Add 1 bag of poollife® TurboShock® Shock Treatment per 10,000 gallons of pool water directly to pool.

Step 3. Add 4 oz. poollife® Defend+® Algaecide per 10,000 gallons of pool water directly to pool.

Housekeeping:

- Remove leaves and other debris from the pool.
- Empty skimmer and pump baskets.
- Brush pool floor, walls, check water level and top up if necessary.
- Check filter pressure and backwash or remove cartridge element and rinse off if required. Follow manufacturers recommendations.
- Chemically clean your cartridge or sand filter with poollife® Filter Cleaner.

Monthly:

Take a pool water sample to your Authorized poollife® Dealer location for a detailed water analysis. This should include testing for total alkalinity, calcium hardness, cyanuric acid and metals.

Safety:

Always read product label instructions BEFORE use. For more safety info and storage and handling questions contact your Authorized poollife® Dealer or visit us at www.poollife.com.
